## ANOTHER MINE FOR PARK CITY

Columbus, Southeast of Little Bell, Drops Into Shoot of Fine Ore.

RICH SHIPMENT OF CARISA

WESTERN ENGINEER RETURNS FROM COBALT CAMP.

A new strike at Park City was the talk of the town on Sunday and yesterday, when it became apparent that things entirely out of the ordinary were happening at the Columbus company's property at the head of Dutch canyon, about a mile southeast of the Little Bell. A few days ago the company decided to sink a winze on a fissure that had been cut in the tunnel and which showed a few inches of nice ore. On Wednesday last it had opened up to nearly four feet, and yesterday morning, according to a telephone message from camp, the entire bottom of the winze was in fine shipping ore and there was ten tons or more of it on the dump, though the hole was only about

fifteen feet deep.

John Paradise, who has the manage-John Paradise, who has the management of the proposition in his hands, was found during the day, and questioned on what was doing. He claimed to have heard nothing since he left the property last Thursday, but he was not surprised to hear that the ledge matter was wider than when he left the mine, as it gave evidence of acting just that way when he left

'A week ago today," said Mr. Para-"A week ago today," said Mr. Paradise, "when sinking was begun, Superintendent David Fisher had two samples of the ore then showing in the fissure assayed. The carbonate showed 47 per cent lead and 6 ounces silver, while the galena carried 53 per cent lead and 34 ounces silver per ton. On Thursday, when the ledge was nearly four feet wide, when the ledge was nearly four feet wide, a man who was at the property with me took a sample of the brown carbonate ore and got returns of 27.20 per cent lead and 34.20 ounces silver. He took a general sample from the bottom of the winze and got returns of 65.30 per cent lead and 17.79 cunces silver from it. Before leaving for home I took a general sample in the winze and got 35 per cent lead and 32.8 ounces silver, while from an average sample of the ore piled up on top I got 17.5 per cent lead and 44.3 ounces silver, with 40 cents in gold. What the vein has shown since Thursday I have not heard, and it was not the intention to talk about the matter until enough work had been done to determine just what the strike the matter until enough work had been done to determine just what the strike was going to amount to. It takes something more than a little ore to make a mine and, even if the strike turns out as well as it now gives evidence of doing, it will be a good while before we shall be in a position to ship and make money out of the ore. I believe the ground is all right. I have always felt that way, and so have most of those who are interested."

Mrs. W. A. McEnery, formerly Mrs. D McLaughim, owns a strong control of e 100,600 shares in the company, while Mr. Paradise is one of the heaviest m nority interests, a few Sait Lakers an Park City men being the holders of the balance of the stock.

#### GOVERNMENT SILVER PURCHASE MADE AGAI

#### RECOVER FAULTED LEDGE.

Good News Is Brought From the Talisman of Beaver County.

P. J. Donohue, under whose direction the old Talisman property is now being developed, has returned from camp highly pleased with developments of the past few days. Through the faulting of the vein the ore bodies had been lost, but he now reports that the ledge has been caught again and that, when he left the mine, there was a full face of ore that would make a fine shipping product. make a fine shipping product.

Mr. Donohue now believes that the mine will continue to respond with ore and that it will be a comparatively easy matter to make it shine with even greater brilliancy than it has done in the past.

#### MINING DISTRICT FORMED.

Walker River Indian Reservation Country Organized by Miners.

The Walker River mining district, embracing the entire Walker River Indian reservation and stretching many miles on either side in places, has been formed by miners and prospectors who gathered at Schurz a few days ago, says the Reno

After electing officers and otherwise completing the formal organization, rules were adopted supplementing the federal and state laws relating to mining. One rule, most unusual in character, forbids the bringing of firearms or other weapons into the district until after the 15th day of November. 1906, and provides further that any person committing such an act ir threatening to assault anyone with fire-arms, knife, rock, club, etc., shall forfeit location rights and be ejected from the

district.

The mining district is the largest in the state and probably the largest in the entire country, containing about 1,700 square miles, and extending into three counties, Esmeralda, Churchill and Lyon.

This district is pear shaped and begins southwest of the reservation near Hot

southwest of the reservation near Hot Springs, fifteen miles west of Hawthorne. From this starting point the line runs east and north, passing north of Hawthorne to a point eight miles northeast of that town, then runs north to San Springs in Churchill county, thence southeast, striking the Yerington district, passing east of Nordyke to the place of beginning. Its total length is about sixty miles with a width varying from twenty. miles with a width varying from twenty to thirty-six miles. It includes the entire reservation and mountain ranges on both

MINING STOCK EXCHANGE.

Large Attendance at Calls Shows Public Is in the Game Again.

A great crowd was in attendance at the essions of the stock exchange yesterday sessions of the stock exchange yesterday and the volume of business done indicated that many of the spectators were in the game. Ajax, Carisa, Lower Mammoth and a number of other modest-priced shares commanded most attention in the local list, while Nevada Halls, Nevada-Fairview, Silver Pick, Stray Dog, Montgomery Mountain and Atlanta, were the Nevada participants in the regular trading list. Nearly all the stocks sold up, some of them for good gains, others for only fractional amounts, but the trend of the market was all suggestive of boom times ahead.

the list of final quotations and record of sales made being as follows:

Western Engineer Tells of the Northern Bonanza Silver Camp.

J. J. Riley, the well-known Los Angeles and Nevada mining engineer who has SOME DIVIDEND During the two regular and open board calls a total of 109,333 shares of stock, with a selling value of \$45,163.55, changed hands, the past six months in the interests of the past six months in the interests of Joseph J. Bamberger and other eastern clients, reached Salt Lake Sunday on his way back from the northern silver fields. He has with him a collection of ores from the marvelously rich ledges and fissures of the sensational camp. Slabs of practically pure silver the size of the hand, nuggets of the same metal as large as hen's eggs and chunks of cobalt ore carrying from 500 to 700 ounces of silver per ton are to be seen in Mr. Riley's collection.

work of fissures in which so much pure silver is being dug out without reaching the conclusion that depth is going to reveal marvelous things. During my stay in the district I saw any number of slabs of pure silver that would measure from a foot to two or three feet square, and from a quarter of an inch to several inches in thickness taken out of the fissures. These fissures or fractures connect with the lider of the sures. nect with the ledges sometimes vertically and just as often horizontally and the mineralization follows one kind as readily as another, so far as development has dis

There is something over a dozen pro ter to get materials in and the ores out of

> From here Mr. Riley will go to Nevada and make professional inspection of properties in Fairview, Wonder, Bullfrog and other camps and at the same time try and ver. find time to visit with his wife and family for a short time in Los Angeles before returning to New YoYrk to make his reports. Mr. Riley was joined there by Mrs. Riley, who will likely accompany him port way on his trip into Nevada.

#### RICH CARISA ORE.

ings Nets Over \$3,500.

Just to illustrate the character of ore that is coming from the 300-foot of the Carisa company's Tintic mines. Manager H. S. Joseph stated yesterday that a carload of ore, fifty tons, would be settled for during the day and that the company would pull down over \$70 a ton for the lot. In other words the consignment would

This ore comes from that portion of the property where such sensational develop-ments have been taking place during the past few weeks and from which it is ex-pected that a great tonnage will be mined after elbow room is made for the miners

James M. Kennelly pulled out for Arizona, by way of St. George, last night. He took some men with him to work on Three carloads of ore from Alta, two from Stockton, two from Ophir and one employed there. The sampling of the ore bodies on this level for the past four days, Marager Joseph states, have shown the presence of 10 per cent copper, thirty-on-cunces silver and 38 in gold per ton In addition to the rich grades are coming regularly to market.

#### BOSTON CON. NEW MILL.

Structural Material Begins to Arrive and Work Is Being Pushed.

Beston Consolidated company's 3,000-too milling plant at Garfield. After a great deal of trouble and hustling a good force of men and teams are now hurrying up the work of building grades for years are the work of building grades for years. the work of building grades for yard trackage, etc., while the construction of the main buildings is about to be whooped

iron have reached the works and are how leing unloaded, while every day, nearly, from now until all the stuff is on hand, the first assays indicated that his company would receive close to \$30 a ton, net, tically all of the mammoth retaining valls, foundations, pier supports and other features of the work represented in concrete are in place, while all the build-ings for the storage of material, quarters for men, workshops, etc., have been fin-ished. So, good weather or bad, the work can proceed without interruption through the winter.

#### PARK MINING NOTES.

Ore Shipments Continue Heavy-

low to show for his efforts.

Manager Rood of the Ontario was in camp yesterday noting the progress of work in the drain tunnel. The experi-ments with the diamond drills have been in progress all week, but as yet nothing startling has transpired. The first hole sent in, however, struck a timber in the

tunnel, so that all the work was for naught. Another hole has been com-menced and the coming week is fully expected to be productive of good and permanent results.

Work is going on encouragingly at the Nelson-Queen, Elkhorn district property, where a new steam plant is being installed and everything put in readiness for a campaign of strenuous work during the winter. A large amount of prospecting and development work has been done at these claims, and conditions are now such that with proper equipment ore can be taken out and regular shipments made. If this is made a shipping proposition a revival of interest and work will doubt-

revival of interest and work will doubt-less be experienced in that district. Manager James McGregor of the Magiolia-St. Louis property came up from the city yesterday to note the progress of the installation of the new steam plant, with which he will delve for the vast riches which he is certain exist in this ground. The improvements which have been under way for six weeks past are fast near-ing completion and all points to the beginning of active operations by Nov. 1. share The new boilers, engine and general hotal

## INTEREST WAS SADLY LACKING

Little Doing in the Market Except in a Few Special Stocks.

RUMORS

U. S. STEEL DIRECTORS WILL Am MEET TODAY.

New York, Oct. 29 .- The active interest Am in today's stock market was of the slen- Am derest outside of special movements on a Am ton are to be seen in Mr. Kney's concetion.

"The district is, in many ways, a wonderful one," said Mr. Riley during the
afternoon, "and there is no question but
what it has a great future before it,
though the mining laws and rules of the
country are irritating enough to make an
American wish himself back in his own
country after a wrestle with conditions
up there.

"The district is not old enough yet and
there has not been enough work done to
say just what conditions are going to be
at depth, but no one can inspect the splendid ledges of cobalt ore and note the network of fissures in which so much pure
silver is being dug out without reaching
the conclusion that depth is going to reyeal marvelous things. During my stay

There were no notable changes in the

There were no notable changes in the conditions which operated last week to restrain speculative activity. Large attention still centers on the struggle of the Bank of England to recuperate its forces. The fact that the \$5,000,000 of newly arrived South African gold went almost wholly in to the bank at adjusting almost wholly in to the bank at a decline in the price paid was accepted as a help-ful factor. But special domestic re-

heans of the customary drifting, cross-
utting and stoping.

TREASURY STOCK.

Salt Lake Ely mine for sale, 50c per share. W. W. Byrne, treesurer, Kenyon hatel.

quirements are to be met by the London money market this week which are expected to make a drain of an amount to fully offset this gain.

The call money market was quiet, but the tone of time loans was reported again to be strong, especially for the minety-day period carrying over the end of the year. Foreign exchange was weak. Railroad traffic officials reported increasing difficulty in the growing shortage of cars and unchecked accumulation of freight.

The rise in Pennsylvania, which was

The rise in Pennsylvania, which was the last to occur, was taken advantage of to sell other stocks, so that the gains were nearly all wiped out except that in Pennsylvania itself. The closing tone was Pennsylvania itself. The closing tone was easy.

Bonds were irregular. Total sales, par value, \$1,540,000. United States bonds were unchanged on call.

Washington, Oct. 29.—Today's statement of the treasury balances in the general fund shows: Available cash balance, \$232, 330,639; gold coin and bullion, \$110,544,930; gold certificates, \$42,380,020.

#### DON'T LET YOUR MONEY LOAF.

If you have much or little money, better have it earning something. Remember, all fortunes had their foundation laid in saving, and mon-ey makes money only when it is

put to work.

It isn't thrifty to let your money lie idle, particularly when a strong financial institution would pay you four per cent per annum interest on it, compounded semi-annually. We are doing this for hundreds.

UTAH SAVINGS & TRUST CO., NO. 160 MAIN STREET, SALT LAKE CITY.
